FCQ125DV3B FCQ125DAV3B  
FCQ140DV3B FCQ140DAV3B
Thank you for purchasing this Daikin air conditioner. Carefully read this operation manual before using the air conditioner. It will tell you how to use the unit properly and help you if any trouble occurs. After reading the manual, file it away for future reference.

Nous vous remercions pour votre acquisition de ce climatiseur Daikin. Lisez attentivement ce manuel avant d’utiliser le climatiseur. Il vous expliquera comment vous servir correctement de l’appareil et vous guidera en cas de problème. Lorsque vous aurez lu le manuel, rangez-le afin de pouvoir vous y référer ultérieurement.

Le agradecemos la compra de este acondicionador de aire Daikin. Lea cuidadosamente el manual de funcionamiento antes de utilizar el acondicionador de aire. Dicho manual le indicará cómo utilizar adecuadamente la máquina y le ayudará en caso de avería. Después de leer el manual, consérvelo para consultas futuras.

Obrigado pela sua compra deste aparelho de ar condicionado Daikin. Leia com atenção este manual de operação antes de proceder à utilização do aparelho de ar condicionado. Este indicará-lhe-á como deverá utilizar a unidade correctamente e ajudá-lo-á no caso de surgir qualquer problema. Depois de ler o manual, guarde-o num local seguro a fim de o poder consultar caso venha a ser preciso.

Σας ευχαριστούμε που αγοράσατε τη συσκευή κλιματισμού. Διαβάστε προσεκτικά αυτές τις οδηγίες χρήσης πριν να χρησιμοποιήσετε τη συσκευή κλιματισμού. Θα σας πους πως θα χρησιμοποιήσετε σωστά τη μονάδα και θα σας βοηθήσουν αν εμφανιστούν προβλήματα. Αφού διαβάσετε τις οδηγίες, βάλτε τις στο αρχείο σας για μελλοντική αναφορά.

La ringraziamo di aver acquistato questo condizionatore d’aria Daikin. Leggere attentamente questo manuale prima di avviare il condizionatore. Ciò permetterà di usare correttamente l’unità e di ottenere un aiuto in caso di anomalia di funzionamento. Dopo aver letto il manuale, conservarlo in un luogo accessibile per una futura necessità.

Wij danken u voor de aankoop van deze Daikin airconditioner. Lees deze bedrijfshandleiding aandachtig door voordat u de airconditioner gebruikt. Het omvat uitleg over het correcte gebruik van de unit en biedt hulp in geval een storing mocht optreden. Gebruik deze handleding voor verdere raadpleging.

Obrigado pela sua compra deste aparelho de ar condicionado Daikin. Leia com atenção este manual de operação antes de proceder à utilização do aparelho de ar condicionado. Este indicará-lhe-á como deverá utilizar a unidade correctamente e ajudá-lo-á no caso de surgir qualquer problema. Depois de ler o manual, guarde-o num local seguro a fim de o poder consultar caso venha a ser preciso.
Disposal requirements

Your air conditioning product is marked with this symbol. This means that electrical and electronic products shall not be mixed with untreated household waste.

Do not try to dismantle the system yourself: the dismantling of the air conditioning system, treatment of the refrigerant, of oil and of other parts must be done by a qualified installer in accordance with relevant local and national legislation.

Air conditioners must be treated at a specialized treatment facility for re-use, recycling and recovery. By ensuring this product is disposed of correctly, you will help to prevent potentially negative consequences for the environment and human health. Please contact the installer or local authority for more information.

Batteries must be removed from the remote controller and disposed of separately in accordance with relevant local and national legislation.

Specifics of smallment

The climatizer is contrasegno with this symbol, ciò significa che i prodotti elettrici e elettronici non possono essere smaltiti insieme ai rifiuti domestici non differenziati.

Non cercare di rimuovere il sistema da solo: la rimozione del sistema di climatizzazione, nonché il recupero del refrigerante, dell’olio e di qualsiasi altra parte devono essere eseguiti da un installatore qualificato in conformità alla legislazione locale e nazionale vigente in materia.

I climatizzatori devono essere trattati presso una struttura specializzata nel riutilizzo, riciclaggio e recupero dei materiali. Il corretto smallmento del prodotto eviterà il possibil recupero negativo all’ambiente e al sistema fisiologico dell’uomo. Per maggiori informazioni contattare l’installatore o le autorità locali.

Le batterie devono essere tolte dal telecomando e smaltite separatamente conformemente alla legislazione locale e nazionale vigente in materia.

Important information regarding the refrigerant used
This product contains fluorinated greenhouse gases covered by the Kyoto Protocol.
Refrigerant type : R410A
GWP (1) value : 1975
GWP = global warming potential
Periodical inspections for refrigerant leaks may be required depending on European or local legislation. Please contact your local dealer for more information.

1. WHAT TO DO BEFORE OPERATION
This operation manual is for the following system with standard control. Before initiating operation, contact your Daikin dealer for the operation that corresponds to your system.

- Indoor unit
- Outdoor unit
- Unit with remote controller
- Unit without remote controller (When used as simultaneous operation system)

NOTE
• If the unit you purchased is controlled by a wireless remote controller, also refer to the wireless remote controller's operation manual.

If your installation has a customized control system, ask your Daikin dealer for the operation that corresponds to your system.

• Heat pump type
This system provides cooling, heating, automatic, program dry, and fan operation modes.

PRECAUTIONS FOR GROUP CONTROL SYSTEM OR TWO REMOTE CONTROLLERS CONTROL SYSTEM
This system provides two other control systems beside individual control (one remote controller controls one indoor unit) system. Confirm the following if your unit is of the following control system type.

- Group control system
One remote controller controls up to 16 indoor units. All indoor units are equally set.

- Two remote controllers control system
Two remote controllers control one indoor unit (In case of group control system, one group of indoor units)
The unit is individually operated.

NOTE
• Contact your Daikin dealer in case of changing the combination or setting of group control and two remote controllers control systems.

Names and functions of parts

| a | Indoor unit |
| b | Outdoor unit |
| c | Remote controller |
| d | Inlet air |
| e | Discharge air |
| f | Air outlet |
| g | Air flow flap (at air outlet) |
| h | Refrigerant piping, connection electric wire |
| i | Drain pipe |
| j | Air inlet |
The built-in air filter removes dust and dirt.
| k | Drain pumping out device (built-in) |
| l | Condensate removed from the room during cooling. |
| m | Ground wire |
| n | Wire to ground from the outdoor unit to prevent electrical shocks. |
2. SAFETY CONSIDERATIONS
We recommend that you read this instruction manual carefully before use to gain full advantage of the function of the air conditioner, and to avoid malfunction due to mishandling.

This air conditioner comes under the term “appliances not accessible to the general public”.

• The precautions described below are WARNING and CAUTION. These are very important precautions concerning safety. Be sure to observe all of them without fail.

⚠️ WARNING ...These are the matters with possibilities leading to serious consequences such as death or serious injury due to erroneous handling.

⚠️ CAUTION ....These are the matters with possibilities leading to injury or material damage due to erroneous handling including probabilities leading to serious consequences in some cases.

• After reading, keep this manual at a place where any user can read at any time. Furthermore, make certain that this operation manual is handed to a new user when he takes over the operation.

⚠️ WARNING — Avoid exposure of your body directly to the cold air for a long time, or avoid excessive exposure of your body to the cold air. Otherwise, your physical condition may be deteriorated and/or your health may be ruined.

When the air conditioner is in abnormal conditions (smell of something burning, etc), turn off power, and contact the dealer where you purchased the air conditioner.

Continued operation under such circumstances may result in a failure, electric shock, and fire.

Ask your dealer for installation of the air conditioner.

Incomplete installation performed by yourself may result in a water leakage, electric shock, and fire.

Ask your dealer for improvement, repair, and maintenance.

Incomplete improvement, repair, and maintenance may result in a water leakage, electric shock, and fire.

Do not insert your finger, a stick, etc., into the air inlet, outlet, and fan blades.

A fan in high-speed running may result in injury.

For refrigerant leakage, consult your dealer.

When the air conditioner is to be installed in a small room, it is necessary to take proper measures so that the amount of any leaked refrigerant does not exceed the limiting concentration even when it leaks. If the refrigerant leaks exceeding the level of limiting concentration, an oxygen deficiency accident may happen.

For installation of separately sold component parts, ask a specialist.

Be sure to use the separately sold component parts designated by our company.

Incomplete installation performed by yourself may result in a water leakage, electric shock, and fire.

Ask your dealer to move and reinstall the air conditioner.

Incomplete installation may result in a water leakage, electric shock, and fire.

The refrigerant in the air conditioner is safe and normally does not leak. If the refrigerant leaks inside the room, the contact with a fire of a burner, a heater or a cooker may result in a harmful gas.

Do not use the air conditioner until when a service person confirms to finish repairing the portion where the refrigerant leaks.

Do not use any fuse with improper capacity.

The use of a piece of wire and whatnot may result in a failure and fire.

Be sure to establish an earth.

Do not earth the unit to a utility pipe, arrester, or telephone earth.

Incomplete earth may cause electrical shock, or fire.

A high surge current from lightning or other sources may cause damage to the air conditioner.

Be sure to install an earth leakage breaker.

Failure to install an earth leakage breaker may result in electric shocks, or fire.

Consult the dealer if the air conditioner submerges owing to a natural disaster, such as a flood or typhoon.

Do not operate the air conditioner in that case, or otherwise a malfunction, electric shock, or fire may result.

⚠️ CAUTION — Do not use the air conditioner for other purposes.

Do not use the air conditioner for a special application such as the storage of foods, animals and plants, precision machines, and art objects as otherwise the deterioration of quality may result.

Do not remove the air outlet of the outdoor unit.

The fan may get exposed and result in injury.

When the air conditioner is used in combination with burners or heaters, perform sufficient ventilation.

Insufficient ventilation may result in an oxygen deficiency accident.

Check and make sure that foundation blocks are not damaged after a long use.

If they are left in a damaged condition, the unit may fall and result in injury.

Neither place a flammable spray bottle near the air conditioner nor perform spraying.

Doing so may result in a fire.

To clean the air conditioner, stop operation, and unplug the power cord from the outlet.

Otherwise, an electric shock and injury may result.
Do not operate the air conditioner with a wet hand. An electric shock may result.
Do not place items that might be damaged by water under the indoor unit. Water may condensate and drip if the humidity reaches 80% or if the drain exit gets clogged.
Do not place a burner or heater at a place directly exposed to the wind from the air conditioner. Incomplete combustion of the burner or heater may result.
Do not allow a child to mount on the outdoor unit or avoid placing any object on it. Falling or tumbling may result in injury.
Do not expose animals and plants directly to the wind. Adverse influence to animals and plants may result.
Do not wash the air conditioner with water. Electric shock or fire may result.
Do not install the air conditioner at any place where flammable gas may leak out. If the gas leaks out and stays around the air conditioner, a fire may break out.
Execute complete drain piping for perfect drainage. Incomplete piping may result in a water leakage.
The appliance is not intended for use by young children or infirm persons without supervision. Young children should be supervised to ensure that they do not play with the appliance.
Consult with installation contractor for cleaning the inside of the air conditioner. Wrong cleaning may make the plastics parts broken or cause failure of water leakage or electric shock.
Do not place objects in direct proximity of the outdoor unit and do not let leaves and other debris accumulate around the unit. Leaves are a hotbed for small animals which can enter the unit. Once in the unit, such animals can cause malfunctions, smoke or fire when making contact with electrical parts.
Never touch the internal parts of the remote controller. Do not remove the front panel. Some parts inside are dangerous to touch, and a machine trouble may happen.
For checking and adjusting the internal parts, contact your dealer. Avoid placing the remote controller in a spot splashed with water.
Water coming inside the machine may cause an electric leak or may damage the internal electronic parts.
Watch your steps at the time of air filter cleaning or inspection. High-place work is required, to which utmost attention must be paid. If the scaffold is unstable, you may fall or topple down, thus causing injury.

### 3. OPERATION RANGE

If the temperature or the humidity is beyond the following conditions, safety devices may work and the air conditioner may not operate, or sometimes, water may drop from the indoor unit.

D B: Dry bulb temperature
WB: Wet bulb temperature
The setting temperature range of the remote controller is 16°C to 32°C.
**4. INSTALLATION SITE**

Regarding places for installation
- Is the air conditioner installed at a well-ventilated place where there are no obstacles around?
- Do not use the air conditioner in the following places.
  a. Filled with much mineral oil such as cutting oil
  b. Where there is much salt such as a beach area
  c. Where sulfured gas exists such as a hot-spring resort
  d. Where there are considerable voltage fluctuations such as a factory or plant
  e. Vehicles and vessels
  f. Where there is much spray of oil and vapor such as a cookery, etc.
  g. Where there are machines generating electromagnetic waves
  h. Filled with acid and/or alkaline steam or vapor
- Is a snow protection measure taken?
  For details, consult your dealer.

Regarding wiring
- All wiring must be performed by an authorized electrician.
  To do wiring, ask your dealer. Never do it by yourself.
- Make sure that a separate power supply circuit is provided for this air conditioner and that all electrical work is carried out by qualified personnel according to local laws and regulations.

Pay attention to running noises, too
- Are the following places selected?
  a. A place that can sufficiently withstand the weight of the air conditioner with less running noises and vibrations.
  b. A place where the hot wind discharged from the air outlet of the outdoor unit and the running noises.
- Are you sure that there are no obstacles near the air outlet of the outdoor unit?
  Such obstacles may result in declined performance and increased running noises.
- If abnormal noises occur in use, consult your dealer.

Regarding drainage of drain piping
- Is the drain piping executed to perform complete drainage?
  If proper drainage is not carried out from the outdoor drain pipes during air-conditioning operation, chances are that dust and dirt are clogged in the pipe. This may result in a water leakage from the indoor unit. Under such circumstances, stop the operation of the air conditioner, and then consult your dealer or our service station.

**5. OPERATION PROCEDURE**

- Operation procedure
  Read the operation manual attached to the remote controller.

- Operating procedure varies with heat pump type and cooling only type. Contact your Daikin dealer to confirm your system type.
- To protect the unit, turn on the main power switch 6 hours before operation.
- If the main power supply is turned off during operation, operation will restart automatically after the power turns back on again.

**AIR FLOW DIRECTION ADJUST**

Press the AIR FLOW DIRECTION button to adjust the air flow angle.

- The movable limit of the flap is changeable. Contact your Daikin dealer for details.

**Operation mode includes automatic operation.**
6. OPTIMUM OPERATION
Observe the following precautions to ensure the system operates.
• Adjust the room temperature properly for a comfortable environment. Avoid excessive heating or cooling.
• Prevent direct sunlight from entering a room during cooling operation by using curtains or blinds.
• Ventilate the room regularly. Using the unit for long periods of time requires attentive ventilation of the room.
• Keep doors and windows closed. If the doors and windows remain open, room air will flow out and cause to decrease the effect of cooling and heating.
• Do not place other heaters directly below the indoor unit. They may deform due to the heat.
• Never place objects near the air inlet and the air outlet of the unit. It may cause deterioration in the effect or stop in the operation.
• Turn off the main power supply switch when it is not used for long periods of time. When the main power switch is turned on, some watts of electricity is being used even if the system is not operating. Turn off the main power supply switch for saving energy. When reoperating, turn on the main power supply switch 6 hours before operation for smooth running (Refer to MAINTENANCE).
• When the display shows " ■ " (TIME TO CLEAN AIR FILTER), ask a qualified service person to clean the filter (Refer to MAINTENANCE).
• Fully use the function of air flow direction adjust. Cold air gathers on the floor, and warm air gathers in the ceiling. Set the air flow direction parallel during cooling or dry operation, and set it downwards during heating operation. Do not let the air blow directly to a person.

7. MAINTENANCE
(FOR SERVICE PERSONNEL)

ONLY A QUALIFIED SERVICE PERSON IS ALLOWED TO PERFORM MAINTENANCE

IMPORTANT!
• BEFORE OBTAINING ACCESS TO TERMINAL DEVICES, ALL POWER SUPPLY CIRCUITS MUST BE INTERRUPTED
  • To clean the air conditioner, be sure to stop operation, and turn the power switch off. Otherwise, an electric shock and injury may result.
  • Do not wash the air conditioner with water. Doing so may result in an electric shock.
  • Be careful with a scaffold or staging. Caution must be exercised because of work at a high place.

HOW TO CLEAN THE AIR FILTER
Clean the air filter when the display shows " ■ " (TIME TO CLEAN AIR FILTER).
It will display that it will operate for a set amount of time. Increase the frequency of cleaning if the unit is installed in a room where the air is extremely contaminated.
If the dirt becomes impossible to clean, change the air filter. (For changing air filter, please contact your dealer.)

1. Open the suction grille.
   Pull it downward slowly while pressing the buttons provided on two spots.
   (Do the same procedure for closing.)

2. Remove the air filters.
   Pull the hook of the air filter out diagonally downward, and remove the filter.

3. Clean the air filter.
   Use vacuum cleaner A) or wash the air filter with water B).
   A) Using a vacuum cleaner
   B) Washing with water
   When the air filter is very dirty, use soft brush and neutral detergent.
   Remove water and dry in the shade.
NOTE
• Do not wash the air conditioner with hot water of more than 50°C, as doing so may result in discol-
oration and/or deformation.
• Do not expose it to fire, as doing so may result in burning.

4. Fix the air filter.
(1) Hook the air filter to a protrusion on the suction grille.
(2) Push the lower part of the air filter onto the protrusion at the lower part of the suction grille, and fix the air filter there.

5. Shut the suction grille.
Refer to item No. 1.

6. After turning on the power, press FILTER SIGN RESET button.
The “TIME TO CLEAN AIR FILTER” display van-
ishes.

HOW TO CLEAN AIR OUTLET AND OUTSIDE PANELS
• Clean with soft cloth
• When it is difficult to remove stains, use water or neutral detergent.
• When the flap is extremely contaminated, remove it as below and clean or exchange it.
(For changing the flap, please contact your dealer.)

NOTE
• Do not use gasoline, benzene, thinner, polishing powder, liquid insecticide. It may cause discolor-
ing or warping.
• Do not let the indoor unit get wet. It may cause an electric shock or a fire.
• Do not scrub firmly when washing the blade with water.
  The surface sealing may peel off.
• Do not use water or air of 50°C or higher for cleaning air filters and outside panels.

HOW TO CLEAN THE SUCTION GRILLE
1. Open the suction grille.
   Push it downward slowly while pressing the buttons provided on two spots. (Follow the same procedure for closing.)
WHAT TO DO WHEN STOPPING THE SYSTEM FOR A LONG PERIOD

Turn on FAN OPERATION for a half day and dry the unit.

Cut off the power supply.

- When the main power switch is turned on, some watts of electricity is being used even if the system is not operating. Turn off the main power supply switch for saving energy.
- The display on the remote controller will vanish when the main power switch is turned off.

Clean the air filter and the exterior.

- Be sure to replace the air filter to its original place after cleaning. Refer to “MAINTENANCE”.

III. NOISE OF AIR CONDITIONERS

A ringing sound after the unit is started. This sound is generated by the temperature regulator working. It will quiet down after about a minute.

- A continuous flow “Shuh” sound is heard when the system is in COOLING or DEFROST OPERATION. This is the sound of refrigerant gas flowing through both indoor and outdoor units.
- A “Shuh” sound which is heard at the start or immediately after the stop of operation or which is heard at the start or immediately after the stop of DEFROST OPERATION. This is the noise of refrigerant caused by flow stop and flow change.
- A continuous low “Shah” sound is heard when the system is in COOLING OPERATION or at a stop. The noise is heard when the drain pump is in operation.
- A “Pishi-pishi” squeaking sound is heard when the system is in operation or after the stop of operation. Expansion and contraction of plastic parts caused by temperature change makes this noise.

IV. DUST FROM THE UNITS

- Dust may blow out from the unit after starting operation from long resting time. Dust absorbed by the unit blows out.

V. THE UNITS GIVE OFF ODORS

The unit absorbs the smell of rooms, furniture, cigarettes, etc., and then emits them.
VI. THE LIQUID CRYSTAL OF THE REMOTE CONTROLLER SHOW “88”
• It happens immediately after the main power supply switch is turned on.
  This shows that the remote controller is in normal condition.
  This continues temporary.

9. TROUBLE SHOOTING

I. If one of the following malfunctions occurs, take the measures shown below and contact your Daikin dealer.

The system must be repaired by a qualified service person.

WARNING
When the air conditioner is in abnormal conditions (smell of something burning, etc), unplug the power cord from the outlet, and contact your dealer
Continued operation under such circumstances may result in a failure, electric shock, and fire.

• If a safety device such as a fuse, a breaker or an earth leakage breaker frequently actuates;
  Measure: Do not turn on the main power switch.
• If the ON/OFF switch does not properly work;
  Measure: Turn off the main power switch.
• If water leaks from unit.
  Measure: Stop the operation.
• If the display “  ” (INSPECTION), “UNIT No.”, and the OPERATION lamp flash and the “MALFUNCTION CODE” appears.
  Measure: Notify your Daikin dealer and inform him/her of the display.

II. If the system does not properly operate except for the above mentioned case, and none of the above mentioned malfunctions is evident, investigate the system according to the following procedures.

1. If the system does not operate at all.
  • Check if there is a power failure.
    Wait until power is restored. If power failure occurs during operation, the system automatically restarts immediately after the power supply recovers.
  • Check if no fuse has blown.
    Turn off the power supply.
  • Check if the breaker is blown.
    Turn the power on with the breaker switch in the off position.
    Do not turn the power on with the breaker switch in the trip position. (Contact your dealer.)

2. If the system stops operating after operating the system.
  • Check if the air inlet or outlet of outdoor or indoor unit is blocked by obstacles.
    Remove the obstacle and make it well-ventilated.
  • Check if the air filter is clogged.
    Ask a qualified service person to clean the air filters (Refer to MAINTENANCE).

3. The system operates but it does not sufficiently cool or heat.
  • If the air inlet or outlet of the indoor or the outdoor unit is blocked with obstacles.
    Remove the obstacle and make it well-ventilated.
  • If the air filter is clogged.
    Ask a qualified service person to clean the air filters (Refer to MAINTENANCE).
  • If the set temperature is not proper.
  • If the FAN SPEED button is set to LOW SPEED.
  • If the air flow angle is not proper (Refer to AIR FLOW DIRECTION ADJUST).
  • If the doors or the windows are open. Shut doors or windows to prevent wind from coming in.
  • If direct sunlight enters the room (when cooling).
    Use curtains or blinds.
  • When there are too many inhabitants in the room (when cooling).
    Cooling effect decreases if heat gain of the room is too large.
  • If the heat source of the room is excessive (when cooling).
    Cooling effect decreases if heat gain of the room is too large.
